

Some older self-containing portable AC units were donated to a racket ball club in Lombard, IL when their main air conditioning system went kaput. While playing racket ball, sweating is common, but when the AC goes down, it is miserable while playing racket ball. In this portable spot cooling setup, the cool air from the portable units were directed into the racket ball court area where tournaments were taking place in 2023. We do our best to help all organizations with cooling in the summertime. Please do not hesitate to give us a call, you never know what type deal we may offer you.
