

We honor any major chain emergency cooling requirements. We happened to help-out a major restaurant chain in the suburbs of Chicago last summer season. This restaurant location in Oak Lawn, IL needed our help keeping employees comfortable in their smoking hot kitchen. The heat output from stoves and ovens can take a toll on employee's bodies and increase the risk of accidents in the workplace. The expense to add adequate cooling is far less than if an injury occurs due to fatigue. Please keep your workers cool and safe at work. Please do not hesitate to call us today.
