

When a general contractor in the neighborhood of Lincoln Park in downtown Chicago called, he mentioned that a Mechanical Contractor referenced "Rent AC" to him for portable AC's. The GC needed some rentals quickly for his project. The GC is known for some highly exquisite projects with original detail, grabbing attention to his original architectural design. Upon receiving the call, we jumped all over it and provided some temporary cooling to areas in the space that were in high demand. Water cooled units were the only option since no hot air venting from an air-cooled model was feasible. Rent AC's high energy level employees get the job done as quick as possible. Take care of the customer now, not later is our motto.
