

Entertainment is a priority for most couples trying to relax and enjoy their evening. One of the functions of entertainment is eating some exceptional food with great service. This restaurant offers great food and service. They take a lot of pride in what they do and are a leader in the Japanese, Sushi, Seafood and Steak Industry in downtown Chicago neighborhood of River North. Climate Controlled Comfort goes hand in hand with great dining. When they had an issue with their cooling system in the restaurant, which was recognized in advance, they phoned us for emergency cooling. All it takes is one thing in a restaurant to spoil a great eating experience! Great management teams are proactive and see when something is not right in advance. When we received the call late morning, we jumped on a portable cooling solution right away in advance of the evening dining rush. Making people happy and satisfied is why we enjoy going to work every day.
